13 HPWS
13 Super
24 HPWS
37 HPWS
BW 16
10' Splitter

Your #1 Source For Fire-wood Processing Equipment, with the most extensive line of Processors, Woodsplitters & Conveyors in the world.

Designed specifically for the tree services and large commercial firewood splitting operations the 37 HPWS commercial firewood splitter is in a class of its own! Towable from the end opposite from the wedge, you can tow it down the road and away from the woodpile with ease! Because it has a 37 H.P. engine we are able to use a single stage hydraulic pump which has three advantages over 2-stage pumps:

1. When used with our custom 4 1/2"x24" cylinder you get a true 6 sec. cycle time (2-stage pumps slow to a crawl when splitting tough chunks).
2. Single stage pumps run cooler
3. You can rebuild single stage pumps

Features:

Engine

Pump

Wedge

Cylinder

Stroke

Miscellaneous

Standard

24 H.P. Honda

Two Stage

4 Way, 6 Way

Custom 4.5" w/3" rod

24"

Hydraulic Log Lift

Optional

8 Way, 10 Way

5" Cylinder

32", 36", 48" Stroke
