## FIREWOOD CONVEYORS

Built-Rite conveyors use belts and rubber cleats instead of chains and paddles so you have a smoother, quieter, easier to maintain conveyor. BR- (26,32, and 50) conveyors are top drive. They all can be purchased with their own motor so they can run independently or without a motor and run off the processor. Unlike competitors, Built-Rite uses a crank hydraulic jack to change the height of the conveyor on the BR- (12-20). Crank jacks don't settle like pump jacks and are much quicker to operate. A popular option is the separator grate and pan mounted at the top of the conveyor which removes additional bark and chips before they go into the truck

### Features:

Engine

Drive

Lift

### BR-(12-20)

- 4 H.P. Honda Gas
- Belt Driven
- Crank Jack

### BR- (26-50)

- 5.5 H.P. Honda Gas
- Hydraulic Top Drive
- Hydraulic Lift
