

Efficient and Versatile.

We have one trailer! We haul the skidder in, go get the loader and we're ready to haul logs out upon returning. It's very efficient and versatile to haul three different machines and logs!

Todd and Battle Wagon Trailers do business the right way – they take care of their customer, they are very accommodating and available! We had a regular Battle Wagon for over 10 years, but our new loader was too tall – Todd and his team knew just what we needed and designed a trailer to accommodate the max height and clearance for three machines!

If you want a trailer to suit your needs – call Battle Wagon!
